

SYMMETRY COMPLETEVIEW VIEWPOINT

Symmetry CompleteView ViewPoint works in conjunction with AMAG's Symmetry CompleteView Video Management System to display and record a targeted computer's desktop or attached webcam. Up to eight desktop monitors or webcams may be displayed and recorded from a single PC. Symmetry CompleteView treats the streams as it would any physical IP camera, allowing for live viewing, playback, PTZ control, and all other functionality associated with a camera connected to Symmetry CompleteView video.

ViewPoint is installed and licensed on each target PC, and for ease of setup will auto-detect all desktop Monitors and web cameras connected to the system. In addition, ViewPoint lists available audio source devices connected to the target PC which optionally can be associated with attached desktop monitors and webcams.

ViewPoint can stream desktop monitor activity from target PC's running Symmetry Security Management software, for example in Security Operations Centers or control room environments. Capturing the operator's desktop monitor output and other activity provides insights to incidents and how they were handled. Managers can see exactly what the operator saw and assess situations.

KEY FEATURES:

- Display and record ViewPoint target PC's desktop or attached webcam as video feed using Symmetry CompleteView
- Display live or recorded view of ViewPoint target PC's attached desktops and webcams as cameras from Symmetry client software
- Up to 8 desktops or webcams may be displayed and recorded from a single PC

APPLICATIONS INCLUDE:

- Monitor computer desktop displays of operators within Security Operation Centers
- Monitor computer desktop displays of employees working with sensitive materials

COMPATIBLE SOFTWARE

Symmetry CompleteView ViewPoint integrates with Symmetry CompleteView Video Management system 4.7.3 and higher. Symmetry CompleteView ViewPoint is available for use with Trial, Pro, and Enterprise editions of Symmetry CompleteView VMS. It is licensed and sold on a per computer basis, but comes automatically with Symmetry CompleteView GuardStation Dual and Quad monitor client workstations.

SYSTEM REQUIREMENTS
