SYMMETRY™
SYMMETRY CONNECT

CONNECT is an identity management workflow platform designed for users of the Symmetry Security Management System. For complex organizations with large numbers of employees and contractors, the administration processes involved in managing identities and obtaining departmental approvals for access to specific buildings and areas can be a major time and cost burden. CONNECT reduces operating costs and ensures compliance objectives can be met.

CONNECT helps organizations streamline on-boarding, off-boarding, and access request approval processes. What can take days with multiple emails, phone calls, paper forms and physical signatures, can be accomplished in minutes with Symmetry CONNECT, saving time, money and the risk of error.

CONNECT’s employee self-service provisioning is also initiated from the CONNECT web client. Self-service requests reduce further the email and paperwork processes of an organization, speed up the approval process, and improve the experience for the employee.

Organizations in regulated industries need a proven method to proactively audit every access permission of every employee and contractor. This is an added benefit of CONNECT as it provides an audit capability suitable for the largest organizations with up to thousands of physical locations. CONNECT helps organizations with audit and compliance for internal policies or regulated industry compliance like SOX, PCI, HIPAA and NERC CIP.

WEB BASED PLATFORM
As a web based platform suitable for cloud or on-premise deployments, CONNECT can operate on any PC, tablet or smart phone. Integration with email ensures that departmental approvals and audits are communicated to the relevant departments and individuals in a timely and efficient manner.

KEY FEATURES
- Identity Management
- On / Off Boarding
- Custom approvals workflow
- Policy creation
- Role based permissions
- Door Access provisioning
- Access Group management
- HR system integration
- Symmetry access control integration
- Automated Access Audits
- Compliance dashboards
- Compliance reports
- Badge Template Creation
- Photo ID Processing
- Self Service photo ID
- Self Service access provisioning
**SYMMETRY INTEGRATION**
Tailored specifically for Symmetry Enterprise customers, CONNECT will work with all versions of the Symmetry Security Management System.

**DATA ANALYTICS**
CONNECT contains a comprehensive suite of configurable reports, and a Compliance Dashboard providing immediate access to key performance information for security team members.

**INTEGRATION WITH OTHER SYSTEMS**
Connectors can be created to any HR, ERP or Directory system which provides the initial identity provisioning information for CONNECT.

**VISITOR MANAGEMENT**
Also available on the same technology platform is Symmetry GUEST, AMAG’s advanced visitor management solution, designed to reduce the visitor reception workload, reduce queues, and improve the visitor experience.
