SYMMETRY™
OPTIONAL MODULES VERSION 8

The Symmetry Security Management System software provides a comprehensive range of fully-integrated additional software modules.

This document summarizes the major optional modules. For further information, please refer to the individual data sheets.

KEY BENEFITS
- Greater levels of efficiency, flexibility and effectiveness
- Automates and improves site security
- Enables all security management equipment to be controlled from a single user interface
- Reduces training costs

THREAT LEVEL MANAGER™
- Enables the level of security to be easily changed to match the level of threat
- Supports five fully-customizable threat levels
- Selective access control, depending on the threat level
- Compatible with Government threat-level security policies

WORKFLOW DESIGNER
- Fully customize the alarm acknowledgement process
- Unlimited number of workflows per Symmetry system
- Create simple question and answer guides with actions based on responses
- Automate sending of commands
- Alarm priority updates

INTRUSION MANAGEMENT
- Provides integration with DMP, HISEC®, Honeywell Galaxy®, DSC® and Siemens® intrusion alarm panels
- M2150 Controller provides complete intrusion management for SCIF applications (U.S.A market only)
- Alarms detected by the panels are displayed in the Symmetry Security Management System Software
- Enables complete alarms monitoring from a common user interface
- Two-way communication allows Symmetry to control alarm panels
- Trigger commands give automatic control of external equipment when an alarm occurs
  * Europe, Middle East & Africa only

DATA CONNECT (IMPORT/EXPORT)
- Enables identity data to be imported/exported from/to third-party databases (e.g. human resources or ERP)
- Allows import/export from/to text or SQL database
- Encryption prevents unauthorized imports
- Selectable card data for export
- Automatically add access rights during import
- Provides a simple method to receive alarm and event transactions from third party systems
- Real time or batch import
GUARD PATROL MANAGEMENT
- Enables each guard’s patrol tour to be monitored, recorded and reviewed
- Confirms that guards are patrolling correctly
- Determines the sequence of tour points and the time allowed for the guard to travel between them
- Indicates deviations from tour rules
- Standard access-control readers or monitor points can be used as tour points

SYMMETRYWEB™
- Remotely access the Symmetry to perform key functions such as Access Control management, visitor authorisation and alarm management via a web interface.
- Set up new card holders, assign access rights to card readers and doors and register visitors.
- Removes the need to install or maintain local thick client software, while still providing access to data.
- Interface with Symmetry using a standard web browser from a desktop workstation or mobile device

WEB ACCESS
- Fully-integrated Web browser solution using Citrix or Windows Terminal Services
- Provides an easy yet secure method for a user to monitor, control and administer a system from almost any location in the world
- 128-bit Secure Socket Layer (SSL) encryption available
- Enables tasks such as card administration or report generation to be carried out remotely over the Internet or Intranet
- Web Clients require no client installation CD or software protection key
- Security maintained by user login

INTERCOM MANAGEMENT
- Provides an easy-to-use graphical interface for managing and answering calls
- Dedicated Intercom Control screen displays all calls
- Fully integrated with Access Control and Video Management
- A Command button allows a barrier or door associated with the selected intercom to be opened

SAFETY ROLL CALL (MUSTER)
- Produces a report of people, including visitors, who may be in the building and where they are
- Allows multiple muster areas with individual operation
- Invaluable during fire or other emergencies
- New reports are continually generated until no-one is left in the building
- Card readers can be used at muster stations to identify employees
- The muster can start automatically when a monitor point is triggered

XML OPEN INTEGRATION
- Allows systems to exchange data with the Symmetry Security Management System using industry-standard XML and Web Services technologies
- Simplifies the task of linking diverse systems with Symmetry
- Alarms from other systems can be exported to Symmetry for centralized alarm management
- Enables an external system to send commands to Symmetry to control card readers, etc.
- Allows card holder information to be imported and exported

ACTIVE DIRECTORY SINGLE SIGN-ON
- Allows authentication with Microsoft Active Directory. Symmetry used to bypass the normal login and password screen.
