Certified: Device compatibility with Symmetry CompleteView was verified. All features listed in the table above were tested in the verification process.

Common Interface: The device is assumed to be compatible with Symmetry CompleteView based on another device that was verified. This device has not been tested but uses the same driver as another device that has been verified.

PTZ camera support: All cameras marked as “PTZ IP Camera” in the “DEVICE TYPE” list are controllable in Symmetry CompleteView.

*This camera is integrated via Symmetry CompleteView’s generic camera driver. Call AMAG Technology Support at 310.518.2380 for configuration instructions.

**This camera is integrated via Symmetry CompleteView’s PSIA driver.

+Camera based device events are not supported, however Symmetry CompleteView server-based motion detection and server connected IO can be used for event triggering and recording.

†Camera entries specifically listing H.265 in the Compression field have been tested and verified within Symmetry CompleteView to function using the H.265 codec with the named driver. Other models from the same camera manufacturer supporting H.265 may or may not fully function using the same named, verified H.265 compliant driver. The Symmetry CompleteView Generic Driver supports H.265. If the camera manufacturer/model is not represented in the compatible camera list, the Generic Driver may be used. The Generic Driver provides broad, manufacturer non-specific compatibility, thus functionality may be limited for a given camera or compression type.
